

LTA 100

Teller Cash Recycler

Gen-3 TCRs Make “Living with a TCR” Better

The **ATEC LTA line** are the most technologically advanced Teller Cash Recyclers (TCRs) in the market today. With high, low and now, a compact version, the LTA 100 is designed to fit the smallest footprints but remains amazingly versatile as a secure cash recycling system. With more than 2300 ATEC units deployed across the US, customers appreciate the unique features that help streamline business operations. Just as the concept for the original LTA 350 began with a study of teller TCR processes to see what could be improved over previous generations of all manufacturers’ units, the LTA 100 is a result of market demand of a smaller footprint which will fit more scenarios from the same award-winning cash recycling platform. Focusing on “living with a TCR”, the Atec engineers again worked to solve cash management, cash exposure, vault buys issues within a compact design. The research and development has paid off with a product line which makes branch operations simpler with TCRs that do more, do it better, and take less overall management.

Compact Size. The LTA 100 fits under an ADA station or desk and is **25% thinner** than competitor's TCRs.

Capacity. The LTA line has by far the **largest capacity** in its class.

Split or Full Cassettes for Maximum Flexibility. The LTA line can be configured with 3 cassette configurations for a mixture of 3-6 denominations.

Operational Features – LTA 100

- Up to 6 denominations recycling (including foreign currency)
- Up to **8,550** of note dispense capacity.
- Cassettes are compatible with the LTA 380
- Transaction speed of 10 notes/sec
- High resolution bill validator
- Win 10 Embedded
- Compact Footprint
- Duress Dispense
- Separate Reject Bin
- Quickly certifying on all platforms

Unique and Security Features

- 7" Foldable, lockable touch screen
- Built-in jam-clearing and operational instruction videos
- Intelligent Cassettes with inventory and anti-tamper sensors
- Automatic retract of untaken notes prevents exposed cash.
- Serial number recording and note image capture.
- Internationally certified safe with alarm devices
